Military Service: Completed.

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience developing enterprise Hospital Information System (HIS) software using Java, Spring Boot, Oracle SQL, React, and JavaScript. Experienced across the full software development lifecycle, from requirement analysis and implementation to troubleshooting and production support.

TECHNICAL SKILLS

Back-End Development : Java, Spring Boot, Spring MVC, Spring Data, Spring Security, Spring Cloud, Hibernate ORM, RESTful APIs

Front-End Development: JavaScript, React.js, HTML, CSS, Bootstrap

Databases & **Data Management:** Oracle SQL, PostgreSQL, Elasticsearch

DevOps & Tools: Git, Docker, Linux, Apache Tomcat, Toad for Oracle

Build & Testing: Maven, Gradle, JUnit 5

AI-Assisted Development: Claude, Cursor

PROFESSIONAL EXPERIENCE

Full Stack Developer – R&D Department
Medira Healthcare Information Systems | Ordu, Turkey | Nov 2026 – Present

- Evaluated and analyzed software requirements and change requests from the Ordu İl Sağlık Müdürlüğü to deliver tailored technical solutions.
- Developed and maintained scalable full-stack features, building robust back-end services and intuitive front-end user interfaces for the core healthcare platform.
- Collaborated closely with healthcare stakeholders to translate complex clinical workflows and provincial technical requests into high-performance software modules.

Electrical & Electronics Engineer - Construction Department (Military Service)
Turkish Armed Forces | Kırklareli, Turkey | Aug 2025 – Aug 2026

- Conducted on-site technical inspections and comprehensive site surveys for electrical and infrastructure projects. Prepared technical specifications and managed tender documentations.
- Assisted in the preparation, review, and finalization of electrical engineering projects within technical drawings. Enhanced project planning and technical documentation workflows through cross-functional teamwork and problem-solving.

Full Stack Developer – R&D Department
Sisoft Healthcare Information Systems | Ankara, Turkey | Dec 2022 – Aug 2025

- Integrated Central Physician Appointment System (locally known as MHRS) web services into the core HIS platform, building user interfaces and HTTP-based service interactions for real-time appointment management by hospital staff and patients.
- Supervised the on-site HIS deployment at Nyala Sudan-Turkey Training and Research Hospital for 3 months, coordinating deployment activities, monitoring system operations, providing technical leadership, and resolving complex user and system requirements.
- Developed and maintained scalable frontend and backend components of web-based HIS platforms using Java and JavaScript, ensuring high availability.
- Implemented REST API integrations with data mapping and response/error handling for external system connections.
- Optimized SQL queries and managed Oracle database operations to improve application performance.
- Supported Linux-based application environments and contributed across the SDLC: requirement analysis, implementation, troubleshooting, bug fixing, and continuous improvement.

EDUCATION

Bachelor of Science in Electrical and Electronics Engineering | Kirikkale University, Turkey | 2017-2021
